

Directions for Multiplication Battleship

- This game is best played in partners
- Each child needs their own page (Consider laminating for repeated use)
- Each child colors in their ships on the top grid
- Partners take turns choosing a location to attempt to "bomb" They do this by stating the equation (ie. $5 \times 8 = 40$) They mark their attempts on the lower grid
- When every part of a ship has been hit it is sunk
- If a partner misses, the other partner simply says, "Miss"
- If a partner hits, the other partner simply says, "Hit!"
- If a partner says the answer to the equation incorrectly, the other partner simply says, "Misfire!"

Place your ships around the board.

Take turns bombing each others board in an attempt to sink your partner's ships.

Bomb a space on your partner's board by saying the equation that matches where you want to bomb. (5x8=40)
