

MY POWERPOINT

By Ms. Khuu

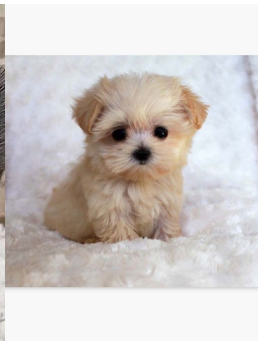

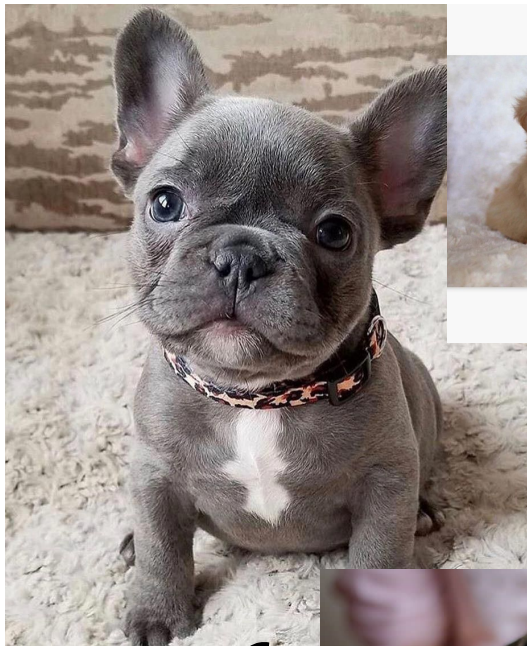

WHAT IS WRONG WITH THIS SLIDE?

When you put too much text in your slides, it is very overwhelming for your audience. It can also be quite boring if all they see are a bunch of words up on the screen. This is why you should keep the big, important ideas in your powerpoint. It's also important to make sure that your text is large enough for the audience to read. If it is too small, your audience won't be able to read it. It helps to add some pictures to the slide, but not too much! Too many pictures make the slides too busy. These are a couple things to keep in mind.

WHAT ABOUT THIS SLIDE?

IS THIS BETTER?

- Keep the text short and to the point.
- Include pictures, but not too many.
- Make sure the text is big enough to read!
